

California Energy Commission

CLASSIFICATION: Electric Generation System Specialist III

TENURE: Permanent

TIME BASE: Full Time

SALARY: \$7,073 - \$8,598
(The salary will be adjusted accordingly to comply with the Personal Leave Program and/or Furlough Program)

LOCATION: Electricity Supply Analysis Division, Electricity Analysis Office
Sacramento

FINAL FILING DATE: UNTIL FILLED

DUTIES/RESPONSIBILITIES:

Under the general direction of the Electricity Analysis Office Manager in the Electricity Supply Analysis Division, the incumbent will supervise the Generation Fuels Team. The EGSS III performs both unit supervision and technical leadership regarding interaction between the natural gas and electricity sectors, the effects of changes in generation fuels markets on electricity generation markets, and estimates of future generation fuels consumption and prices under various policy scenarios. More specifically, the duties include, but are not limited to:

Plans, organizes and directs the work of a unit and other professional staff engaged in natural gas and electricity system issues, electricity generation and transmission analysis, and electricity generation fuels policy development. Reviews products for accuracy, completeness, and professional presentation.

Identifies emergent natural gas and electricity system issues, develops economic, engineering, and environmental research approaches and directs development of related policy recommendations. Acts as the Commission subject matter expert in issues relating to generation fuels usage and policy.

Performs administrative duties including workplans, budgets, personnel actions and weekly status reports. Also, performs supervisory duties including individual and team motivation, probation and performance reviews, career development, employee recognition, and training.

A full duty statement is available at <http://www.energy.ca.gov/careers/jobs.html>.

DESIRABLE EXPERIENCE/QUALIFICATIONS: The successful applicant should have:

- Excellent interpersonal and team leadership skills.
- Ability to successfully work within a larger team environment.
- Ability to communicate complicated information in a simple, consumer friendly manner.
- Ability to coordinate interdisciplinary projects.
- Ability to effectively write and edit technical program information.
